

# CONDENSED UNAUDITED GROUP INTERIM FINANCIAL STATEMENTS

# SEPTEMBER 2018

www.sterlingbankng.com/0070078375464 (0700STERLING)

#### Directors' Report For the period ended 30 September 2018

The Directors present their third quarter report on the affairs of Sterling Bank Plc, together with the unaudited Group Financial Statements for the period ended 30 September, 2018.

#### Principal activity and business review

Sterling Bank Plc is engaged in commercial banking with emphasis on retail, commercial and corporate banking, trade services, investment banking activities and non-interest banking. It also provides wholesale banking services including the granting of loans and advances; letter of credit transactions, money market operations, electronic banking products and other banking activities.

#### Legal form

Sterling Bank Plc, (formerly known as NAL Bank Plc) was the pioneer merchant bank in Nigeria, established on 25 November, 1960 as a private liability company and was converted to a public limited company in April, 1992.

Following the consolidation reforms introduced and driven by the Central Bank of Nigeria in 2004, the Bank emerged from the consolidation of NAL Bank Plc, Indo-Nigerian Bank Limited, Magnum Trust Bank Plc, NBM Bank Limited and Trust Bank of Africa Limited. NAL Bank Plc as the surviving bank adopted a new name for the enlarged entity, 'Sterling Bank Plc'.

The enlarged Bank commenced post merger business operations on January 3, 2006 and the Bank's shares are currently quoted on the Nigerian Stock Exchange (NSE).

In October, 2011, the Bank had a business combination with Equitorial Trust Bank Limited to re-position itself to better compete in the market space.

In compliance with the CBN guidelines on the review of the Universal Banking model, the Bank divested from its four subsidiaries and one associate company on 30 December, 2011.

Sterling Bank Plc registered Sterling Investment Management Plc (the SPV) with the Corporate Affairs Commission as a public liability company limited by shares with authorised capital of N2,000,000 at N1.00 per share. The main objective of setting up the SPV is to raise or borrow money by the issue of bonds or other debt instruments. The SPV is a subsidiary and is consolidated in the financial statements of the Bank. The Bank and its subsidiary is collectively referred to as "the Group".

The Bank has 179 branches including cash centres as at 30 September, 2018.

- To establish an internal audit function and ensure there are other means of obtaining sufficient assurance of regular review • or appraisal of the system of internal controls in the Bank;
- To ensure the development of a comprehensive internal control framework for the Bank, obtain assurance and report annually in the financial report, on the operating effectiveness of the Bank's internal control framework;
- To review such other matters in connection with overseeing the financial reporting process and the maintenance of internal controls as the Committee shall deem appropriate;
- To oversee management's process for the identification of significant fraud risks across the Bank and ensure that adequate prevention, detection and reporting mechanisms are in place;
- At least on an annual basis, obtain and review a report by the internal auditor describing the strength and quality of internal controls including any issues or recommendations for improvement, raised by the most recent internal control review of the Bank;

- Discuss the annual audited financial statements and half yearly unaudited statements with Management and external
- auditors;
- Discuss policies and strategies with respect to risk assessment and management;
- Meet separately and periodically with Management, internal auditors and external auditors;
- To review and ensure that adequate whistle-blowing procedures are in place;
- To review, with the external auditors, any audit scope limitations or problems encountered and management's responses to same;
- To review the independence of the external auditors and ensure that where non-audit services are provided by the external auditors, there is no conflict of interest;
- To consider any related party transactions that may arise within the Bank or Group;
- Invoke its authority to investigate any matter within its terms of reference for which purpose the Bank must make available
   the resources to the internal auditors with which to carry out this function, including access to external advice where necessary:
- Prepare the Committee's report for inclusion in the Bank's Annual Report; and
- Report to the Board regularly at such times as the Committee shall determine necessary.

The members are as follows:

1 Mr. Rasheed Kolarinwa	Chairman
2 Alhaji Mustapha Jinadu	Member
3 Mr. Idongesit E. Udoh	Member
4 Ms. Christie O. Vincent	Member
5 Mr. Olaitan Kajero	Member
6 Mr. Michael Jituboh	

#### **Management Committees**

#### Executive Committee (EXCO)

The Committee provides leadership to the management team and ensures the implementation of strategies approved by the Board. It deliberates and takes decisions on the effective and efficient management of the Bank.

#### 2 Assets and Liability Committee (ALCO)

The Committee ensures adequate liquidity and the management of interest rate risk within acceptable parameters. It also reviews the economic outlook and its impact on the Bank's strategies.

#### 3 Management Credit Committee (MCC)

The Committee approves new credit products and initiatives, minimum/prime lending rate and reviews the Credit Policy Manual. It approves exposures up to its maximum limit and the risk asset acceptance criteria.

#### 4 Management Performance Review Committee (MPR)

The Committee reviews the Bank's monthly performance on set targets and monitors budget achievement. It also assesses the efficiency of resource deployment in the Bank and re-appraises cost management initiatives.

#### 5 Criticised Assets Committee (CAC)

The Committee reviews the Bank's credit portfolio and collateral documentation. It reviews the non-performing loan stock and recovery strategies for deliquent loans.

#### 6 Computer Steering Committee (CSC)

The Committee establishes the overall technology priorities by identifying projects that support the Bank's business plan. It provides guidance in effectively utilizing technology resources to meet business and operational needs of the Bank.

#### 7 Management Risk Committee (MRC)

The Committee is responsible for planning, management and control of the Bank's overall risks. It includes setting the Bank's risk philosophy, risk appetite, risk limits and risk policies.

#### **Succession Planning**

Sterling Bank PIc has a Succession Planning Policy which is aligned to the Bank's overall organisational development strategy. In line with the policy, a new Unit was set-up in the Human Capital Management Group to implement, amongst others, a Succession Plan for the Bank.

Successors were nominated based on experience, skills and competencies through an automated process by current role holders in conjunction with the Human Capital Management Group. Development initiatives have also been put in place to accelerate successors' readiness.

#### Code of Ethics

Sterling Bank has a Code of Ethics that specifies acceptable behavior of its staff. It is a requirement that all staff should sign a confirmation that they have read and understood the document upon employment.

The Bank also has a Sanctions Manual which provides sample offences/violation and prescribes measures to be adopted in various cases. The Chief Human Resource Officer is responsible for the implementation and compliance of the "Code of Ethics".

#### Whistle Blowing Process

The Bank is committed to the highest standards of openness, probity and accountability; hence the need for an effective and efficient whistle blowing process as a key element of good corporate governance and risk management.

Whistle blowing process is a mechanism by which suspected breaches of the Bank's internal policies, processes, procedures and unethical activities by any stakeholder (staff, customers, suppliers and applicants) are reported for necessary actions.

It ensures a high degree of integrity and transparency in order to achieve efficiency and effectiveness in our operations.

The reputation of the Bank is of utmost importance and every staff of the bank has a responsibility to protect the bank from any persons or act that might jeopardize its reputation. Staff are encouraged to speak up when faced with information that would help protect the Bank's reputation.

An essential attribute of the process is the guarantee of confidentiality and protection of the whistle blower's identity and rights. It should be noted that the ultimate aim of this policy is to ensure efficient service to the customer, good corporate image and business continuity in an atmosphere compliant with best industry practice.

The Bank has a Whistle Blowing channel via the Bank's website, dedicated telephone hotlines and e-mail address in compliance

with Section 6.1.12 of the Central Bank of Nigeria (CBN) Code of Corporate Governance for Banks in Nigeria Post Consolidation.

The Bank's Chief Compliance Officer is responsible for monitoring and reporting on whistle blowing.

#### Compliance Statement on Securities Trading by Interested Parties

The Bank has put in place a Policy on Trading on the Bank's Securities by Directors and other key personnel of the Bank.

During the period under review, the Directors and other key personnel of the Bank complied with the terms of the Policy and the provisions of Section 14 of the Amendment to the Listing Rules of The Nigerian Stock Exchange.

#### **Complaint Management Policy**

The Bank has put in place a Complaint Management Policy guiding the resolution of disputes with stakeholders on issues relating to the Investment and Securities Act.

## STATEMENT OF DIRECTORS' RESPONSIBILITIES IN RELATION TO THE FINANCIAL STATEMENTS FOR THE QUARTER ENDED 30 SEPTEMBER 2018

In accordance with the provisions of Sections 334 and 335 of the Companies and Allied Matters Act, CAP C20 Laws of the Federation of Nigeria 2004, and Sections 24 and 28 of the Banks and Other Financial Institution Act, CAP B3 Laws of the Federation of Nigeria 2004, the Directors are responsible for the preparation of the consolidated financial statements and the seperate financial statements which present fairly, in all material respects, the financial position of the Group and the Bank, and of the financial performance for the period. The responsibilities include ensuring that:

- (a) appropriate internal controls are established both to safeguard the assets of the Group and to prevent and detect fraud and other irregularities;
- (b) the Group keeps accounting records which disclose with reasonable accuracy the financial position and performance of the Group and which ensure that the financial statements comply with the requirements of the Companies and Allied Matters Act, CAP C20 Laws of the Federation of Nigeria 2004, Banks and Other Financial Institutions Act, CAP B3 Laws of the Federation of Nigeria 2004, Revised Prudential Guidelines, International Financial Reporting Standards and relevant Circulars issued by the Central Bank of Nigeria;
- (c) the Group has used appropriate accounting policies, consistently applied and supported by reasonable and prudent judgements and estimates.

The directors accept responsibility for the consolidated and seperate financial statements, which have been prepared using appropriate accounting policies supported by reasonable and prudent judgments and estimates in conformity with International Financial Reporting Standards, the requirements of the Companies and Allied Matters Act, CAP C20 Laws of the Federation of Nigeria 2004, Banks and Other Financial Institutions Act, CAP B3 Laws of the Federation of Nigeria 2004, Revised Prudential Guidelines, and relevant Circulars issued by the Central Bank of Nigeria.

The directors are of the opinion that the consolidated and separate financial statements present fairly, in all material respect, the financial position and financial performance of the Group and Bank as of and for the nine months ended 30 September 2018.

The directors further accept responsibility for the maintenance of accounting records that may be relied upon in the preparation of the consolidated and seperate financial statements, as well as adequate systems of financial control.

Nothing has come to the attention of the Directors to indicate that the Group and the Bank will not remain as a going concern for at least twelve months from the date of this statement.

## Notes to the Consolidated and Separate Financial Statements

For the period ended 30 September 2018

#### Corporate information

Sterling Bank Plc, (formerly known as NAL Bank Plc) was the pioneer merchant bank in Nigeria, established on 25 November 1960 as a private limited liability company, and was converted to a public limited liability company in April 1992.

Sterling Bank Plc (the "Bank") together with its subsidiary (collectively the "Group") is engaged in commercial banking with emphasis on retail and consumer banking, trade services, corporate, investment and non-interest banking activities. It also provides wholesale banking services including the granting of loans and advances, letter of credit transactions, money market operations, electronic and mobile banking products and other banking activities.

#### 2 Accounting policies

#### 2.1 (a) Basis of preparation and statement of compliance

The condensed consolidated and separate financial statements of the Bank and its subsidiary have been prepared in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB).

The condensed consolidated and separate financial statements have been prepared on a historical cost basis, except for investments carried at fair value through other comprehensive income, financial assets and liabilities held for trading, all of which have been measured at fair value.

The condensed consolidated and separate financial statements are presented in Nigerian Naira and all values are rounded to the nearest million (N'million) except when otherwise indicated.

#### (b) Functional and Presentation currency

The consolidated and separate financial statements are presented in Nigerian Naira and all values are rounded to the nearest million (N'million) except when otherwise indicated.

#### (c) Basis of Consolidation

The consolidated financial statements comprise the financial statements of the Bank and its subsidiary as at 30 September 2018. Sterling Bank consolidates a subsidiary when it controls it. Control is achieved when the Bank is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee.

Generally, there is a presumption that a majority of voting rights results in control. However, under individual circumstances, the Bank may still exercise control with less than 50% shareholding or may not be able to exercise control even with ownership over 50% of an entity's shares. When assessing whether it has power over an investee and therefore controls the variability of its returns, the Bank considers all relevant facts and circumstances, including:

• The purpose and design of the investee

- The relevant activities and how decisions about those activities are made and whether the Bank can direct those activities
- Contractual arrangements such as call rights, put rights and liquidation rights

• Whether the Bank is exposed, or has rights, to variable returns from its involvement with the investee, and has the power to affect the variability of such returns

Profit or loss and each component of OCI are attributed to the equity holders of the parent of the Group and to the non-controlling interests, even if this results in the non-controlling interests having a deficit balance.

When necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies in line with the Group's accounting policies. All intra-group assets, liabilities, equity, income, expenses and cash flows relating to transactions between members of the Group are eliminated in full on consolidation.

A change in the ownership interest of a subsidiary, without a loss of control, is accounted for as an equity transaction.

If the Group loses control over a subsidiary, it derecognises the related assets (including goodwill), liabilities,noncontrolling interest and other components of equity, while any resultant gain or loss is recognised in profit or loss. Any investment retained is recognised at fair value.

#### (d) Seasonality of operations

The impact of seasonality or cyclicality on operation is not regarded as significant to the condensed interim financial statement. The operation of the Group are expected to be even within the financial year.

#### (e) Issuance, repurchase and repayment of debts and equity securities

During the period under review, there was issuance of commercial paper that resulted in an external inflow into the Bank.

#### (f) Significant events after the end of the reporting period

There were no significant events that occurred after 30 September that would necessitate a disclosure and/or adjustment to the interim results presented herein.

#### (g) Dividends

Dividend declared on the audited results of the Bank for the year ended December 31, 2017 was approved by the shareholders, and paid. However, the Directors did not recommend the payment of any dividend for the Bank's interim results to 30 September 2018.

#### (h) Changes to accounting policy

#### Standards and interpretations effective during the reporting period

Amendments to the following standard(s) became effective in the annual period starting from 1st January, 2018. The new reporting requirements as a result of the amendments and/or clarifications have been evaluated and their impact or otherwise are noted below:

#### IFRS 15 - Revenue from Contracts with Customers

In May 2014, the IASB issued IFRS 15 Revenue from Contracts with Customers, effective for periods beginning on 1 January 2018 with early adoption permitted. IFRS 15 defines principles for recognizing revenue and will be applicable to all contracts with customers. However, interest and fee income integral to financial instruments and leases will continue to fall outside the scope of IFRS 15 and will be regulated by the other applicable standards (e.g. IFRS 9, and IFRS 16 Leases).

Revenue under IFRS 15 will need to be recognised as goods and services are transferred, to the extent that the transferror anticipates entitlement to goods and services. The following five step model in IFRS 15 is applied in determining when to recognise revenue, and at what amount:

- a) Identify the contract(s) with a customer
- b) Identify the performance obligations in the contract
- c) Determine the transaction price
- d) Allocate the transaction price to the performance obligations in the contract
- e) Recognise revenue when (or as) the entity satisfies a performance obligation

The standard also specifies a comprehensive set of disclosure requirements regarding the nature, extent and timing as well as any uncertainty of revenue and the corresponding cash flows with customers. This standard does not have any significant impact on the Group.

#### Amendments to IFRS 1 - First time Adoption of IFRS: Deletion of short- term exemptions for first time adopters

The IASB deleted short term exemptions granted to first time adopters of IFRS as those reliefs are no longer necessary. This amendment does not have any impact on the Group.

#### Amendments to IFRS 2 - Share Based Payment - Classification and measurment of share based payment transactions

This standard clarifies classification and measurement of share based payment transactions with net settlement features for withholding tax obligations (i.e. equity settled share based payment for employees and cash settled share based payment for withholding taxes). It grants an exemption to alleviate operational issues encountered in dividing the share based payment into cash-settled and equity-settled component. The amendments also clarify modifications to terms and conditions that change classifications from cash-settled to equity-settled as well as application of non-market vesting conditions and market non-vesting conditions. This amendment does not have any impact on the Group.

#### **IFRS 9 - Financial instrument**

#### Financial instruments

The Group applied the classification and measurement requirements for financial instruments under IFRS 9 'Financial Instruments' for the period ended 30 June, 2018. The 2017 comparative period was not restated, and the requirements under IAS 39 'Financial Instruments: Recognition and Measurement' were applied. The key changes are in the classification and impairment requirements.

#### - Recognition and initial measurement

Regular purchases and sales of financial assets and liabilities are recognised on the trade date. A financial asset or financial liability is measured initially at fair value plus or minus, for an item not at fair value through profit or loss, direct and incremental transaction costs that are directly attributable to its acquisition or issue. Transaction costs of financial assets and financial liabilities carried at fair value through profit or loss are expensed in profit or loss at initial recognition. Financial assets that are transferred to third parties but do not qualify for derecognition are presented in the statement of financial position as "pledged asset", if the transferree has the right to sell or re-pledge them.

#### - Classification of financial instruments

The Group classified its financial assets under IFRS 9, into the following measurement categories:

- Those to be measured at fair value through other comprehensive income (FVOCI) (either with or without recycling)
- Those to be measured at fair value through profit or loss (FVTPL)); and
- Those to be measured at amortised cost.

The classification depends on the Group's business model for managing financial assets and the contractual terms of the financial assets cash flow (i.e. solely payments of principal and interest- SPPI test). Directors determine the classification of the financial instruments at initial recognition.

The Group classifies its financial liabilities as liabilities at fair value through profit or loss and liabilities at amortised cost.

#### - Subsequent measurements

#### Debt instruments

The subsequent measurement of financial assets depend on its initial classification:

Amortised cost: A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as at FVTPL:

• The asset is held within a business model whose objective is to hold assets to collect contractual cash flows; and

• The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

The gain or loss on a debt investment that is subsequently measured at amortised cost and is not part of a hedging relationship is recognised in profit or loss when the asset is derecognised or impaired. Interest income from these financial assets is determined using the effective interest method and reported in profit or loss as 'Interest income'.

The amortised cost of a financial asset or liability is the amount at which the financial asset or liability is measured at initial recognition, minus principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between the initial amount recognised and the maturity amount, minus any reduction for impairment.

Fair value through other comprehensive income (FVOCI): Investment in debt instrument is measured at FVOCI only if it meets both of the following conditions and is not designated as at FVTPL:

• the asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets; and

• the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

The debt instrument is subsequently measured at fair value. Gains and losses arising from changes in fair value are included in other comprehensive income (OCI) and accumulated in a separate component of equity. Impairment gains or losses, interest revenue and foreign exchange gains and losses are recognised in profit and loss. Upon disposal or derecognition, the cumulative gain or loss previously recognised in OCI is reclassified from equity to profit or loss and recognised in other operating income. Interest income from these financial assets is determined using the effective interest method and recognised in profit or loss as 'Interest income'.

The measurement of credit impairment is based on the three-stage expected credit loss model as applied to financial assets at amortised cost.

Fair value through profit or loss (FVTPL): Financial assets that do not meet the criteria for amortised cost or FVOCI are measured at fair value through profit or loss. The gain or loss arising from changes in fair value of a debt investment that is subsequently measured at fair value through profit or loss and is not part of a hedging relationship is included directly in the profit or loss and reported as 'Net trading income in financial instruments classified as FVTPL' in the period in which it arises. Interest income from these financial assets is recognised in profit or loss as 'Interest income'.

#### **Equity instruments**

The Group subsequently measures all equity investments at fair value. For equity investment that is not held for trading, the Group may irrevocably elect to present subsequent changes in fair value in OCI. This election is made on an investment-by-investment basis. Where the Group's management has elected to present fair value gains and losses on equity investments in other comprehensive income, there is no subsequent reclassification of fair value gains and losses to profit or loss. Dividends from such investments continue to be recognised in profit or loss as other operating income when the Group's right to receive payments is established unless the dividend clearly represents a recovery of part of the cost of the investment. Changes in the fair value of financial assets at fair value through profit or loss are recognised in "Net trading income" in profit or loss.

All other equity financial assets are classified as measured at FVTPL.

#### - Business model assessment

The Group makes an assessment of the objective of a business model in which an asset is held at a portfolio level because this best reflects the way the business is managed and information is provided to management. The information considered includes:

1) The stated policies and objectives for the portfolio and the operation of those policies in practice. In particular, whether management's strategy focuses on earning contractual interest revenue, maintaining a particular interest rate profile, matching the duration of the financial assets to the duration of the liabilities that are funding those assets or realising cash flows through the sale of the assets;

2) How the performance of the portfolio is evaluated and reported to the Group's management;

3) The risks that affect the performance of the business model (and the financial assets held within that business model) and how those risks are managed;

4) How managers of the business are compensated e.g. whether compensation is based on the fair value of the assets managed or the contractual cash flows collected; and

5) The frequency, volume and timing of sales in prior periods, the reasons for such sales and its expectations about future sales activity. However, information about sales activity is not considered in isolation, but as part of an overall assessment of how the Group's stated objective for managing the financial assets is achieved and how cash flows are realised.

Financial assets that are held for trading or managed and whose performance is evaluated on a fair value basis are measured at FVTPL because they are neither held to collect contractual cash flows nor held both to collect contractual cash flows and to sell financial assets.

#### Assessment of whether contractual cash flows are solely payments of principal and interest on principal

For the purposes of this assessment, 'principal' is defined as the fair value of the financial asset on initial recognition. 'Interest' is defined as consideration for the time value of money and for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs (e.g. liquidity risk and administrative costs), as well as profit margin.

In assessing whether the contractual cash flows are solely payments of principal and interest, the Group considers the contractual terms of the instrument. This includes assessing whether the financial asset contains a contractual term that could change the timing or amount of contractual cash flows such that it would not meet this condition. In making the assessment, the Group considers:

- contingent events that would change the amount and timing of cash flows;
- leverage features;
- prepayment and extension terms;
- terms that limit the Group's claim to cash flows from specified assets (e.g. non-recourse asset arrangements); and
- Features that modify consideration of the time value of money e.g. periodical reset of interest rates.

The Group holds a portfolio of long-term fixed rate loans for which the Group has the option to revise the interest rate at future dates. These reset rights are limited to the market rate at the time of revision. The right to reset the rates of the loans based on the revision in market rates are part of the contractually agreed terms on inception of the loan agreement, therefore the borrowers are obligated to comply with the reset rates without any option of repayment of the loans at par at any reset date. The Group has determined that the contractual cash flows of these loans are solely payments of principal and interest because the option varies with the interest rate in a way that is considered a consideration for the time value of money, credit risk, other basic lending risks and costs associated with the principal amount outstanding. Financial assets with embedded derivatives are considered in their entirety when determining whether their cash flows are solely payment of principal and interest.

#### - Reclassifications

Financial assets are not reclassified subsequent to their initial recognition, except in the period after the Group changes its business model for managing financial assets that are debt instruments. A change in the objective of the Group's business occurs only when the Group either begins or ceases to perform an activity that is significant to its operations (e.g., via acquisition or disposal of a business line).

The following are not considered to be changes in the business model:

• A change in intention related to particular financial assets (even in circumstances of significant changes in market conditions)

- A temporary disappearance of a particular market for financial assets
- A transfer of financial assets between parts of the entity with different business models

When reclassification occurs, the Group reclassifies all affected financial assets in accordance with the new business model. Reclassification is applied prospectively from the 'reclassification date'. Reclassification date is 'the first day of the first reporting period following the change in business model. Gains, losses or interest previously recognised are not restated when reclassification occurs.

The Group may only sell insignificant portion of debt instruments measured at amortised cost frequently without triggering a change in business model. If the Group sells significant portions, this will not be more than twice a year subject to cases of unlikely to reoccur events such as:

- Run on the Bank/stressed liquidity scenarios
- Credit risk event i.e. perceived issuer default

- In the event of merger and takeover, the Bank may sell portion of the portfolio if the security holdings violates set limits

- Other one-off events

Significance is defined to me 5% of the portfolio value and subject to the policy on frequency above.

The Group may sell debt instruments measured at amortised cost without triggering a change in business model if the sale is due to deterioration in the credit quality of the financial assets or close to maturity. A financial asset is said to be close to maturity if the outstanding tenor of the financial asset from the time of issue is 25% or less of the original tenor.

Sales close to maturity are acceptable if the proceeds from the sales approximate the collection of the remaining contractual cash flows. At the point of sale an assessment will be conducted to determine whether there is more than 10% different from the remaining cash flows.

#### - Modifications of financial assets and financial liabilities

#### **Financial assets**

If the terms of a financial asset are modified, the Group evaluates whether the cash flows of the modified asset are substantially different. If the cash flows are substantially different, then the contractual rights to cash flows from the original financial asset are deemed to have expired. In this case, the original financial asset is derecognised and a new financial asset is recognised at fair value. Any difference between the amortised cost and the present value of the estimated future cash flows of the modified asset or consideration received on derecognition is recorded as a separate line item in profit or loss as 'gains and losses arising from the derecognition of financial assets measured at amortised cost'.

If the cash flows of the modified asset carried at amortised cost are not substantially different, then the modification does not result in derecognition of the financial asset. In this case, the Group recalculates the gross carrying amount of the financial asset and recognises the amount arising from adjusting the gross carrying amount as a modification gain or loss in profit or loss as part of impairment charge for the period.

#### **Financial liabilities**

The Group derecognises a financial liability when its terms are modified and the cash flows of the modified liability are substantially different. This occurs when the discounted present value of the cash flows under the new terms, including any fees paid net of any fees received and discounted using the original effective interest rate, is at least 10 percent different from the discounted present value of the remaining cash flows of the original liability. In this case, a new financial liability based on the modified terms is recognised at fair value. The difference between the carrying amount of the financial liability extinguished and the new financial liability with modified terms is recognised in profit or loss. If an exchange of debt instruments or modification of terms is accounted for as an extinguishment, any costs or fees incurred for as an extinguishment (i.e the modified liability is not substantially different), any costs or fees incurred adjust the carrying amount of the liability and are amortised over the remaining term of the modified liability.

#### - Impairment of financial assets

IFRS 9 impairment requirements are based on an expected credit loss model, replacing the incurred loss model under IAS 39. Key changes in the Group's accounting policy for impairment of financial assets are listed below.

The Group applies a three-stage approach to measuring expected credit losses (ECL) on debt instruments accounted for at amortised cost, FVOCI, loan commitment and financial guarantee contracts. Assets migrate through the following three stages based on the change in credit quality since initial recognition:

#### i) Stage 1: 12-months ECL

For exposures where there has not been a significant increase in credit risk since initial recognition and that are not credit-impaired upon origination, the portion of the lifetime ECL associated with the probability of default events occurring within the next 12 months is recognised. Interest revenue is calculated by applying the effective interest rate to the gross carrying amount.

#### ii) Stage 2: Lifetime ECL - not credit-impaired

For credit exposures where there has been a significant increase in credit risk since initial recognition but are not creditimpaired, a lifetime ECL is recognised. Interest revenue is calculated by applying the effective interest rate to the gross carrying amount.

#### iii) Stage 3: Lifetime ECL - credit-impaired

Financial assets are assessed as credit-impaired when one or more events that have a detrimental impact on the estimated future cash flows of that asset have occurred. As this uses the same criteria as under IAS 39, the Group's methodology for specific provisions remains unchanged. For financial assets that have become credit-impaired, a lifetime ECL is recognised and interest revenue is calculated by applying the effective interest rate to the amortised cost rather than the gross carrying amount.

At each reporting date, the Group assesses whether there has been a significant increase in credit risk for financial assets since initial recognition by comparing the risk of default occurring over the expected life between the reporting date and the date of initial recognition.

In determining whether credit risk has increased significantly since initial recognition, the Group uses its internal credit risk grading system, external risk ratings and forecast information to assess deterioration in credit quality of a financial asset.

The Group assesses whether the credit risk on a financial asset has increased significantly on an individual or collective basis. For the purposes of a collective evaluation of impairment, financial assets are grouped on the basis of shared credit risk characteristics, taking into account instrument type, credit risk ratings, date of initial recognition, remaining term to maturity, industry, geographical location of the borrower and other relevant factors.

The amount of ECL is measured as the probability-weighted present value of all cash shortfalls over the expected life of the financial asset discounted at its original effective interest rate. The cash shortfall is the difference between all contractual cash flows that are due to the Group and all the cash flows that the Group expects to receive. The amount of the loss is recognised using an allowance for credit losses account

The Group considers its historical loss experience and adjusts this for current observable data. In addition, the Group uses reasonable and supportable forecasts of future economic conditions including experienced judgment to estimate the amount of an expected impairment loss. IFRS 9 introduces the use of macroeconomic factors which include, but is not limited to, unemployment, interest rates, gross domestic product, inflation and commercial property prices, and requires an evaluation of both the current and forecast direction of the economic cycle. Incorporating forward looking information increases the level of judgment as to how changes in these macroeconomic factors will affect ECL. The methodology and assumptions including any forecasts of future economic conditions are reviewed regularly.

If, in a subsequent period, credit quality improves and reverses any previously assessed significant increase in credit risk since origination, depending on the stage of the life time2 or stage 3 of the ECL bucket, the Group would continue to monitor such financial assets for a probationary period of 90 days to confirm if the risk of default has decreased sufficiently before upgrading such exposure from life time ECL (Stage 2) to 12- months ECL (Stage 1). In addition to 90 days probationary period above, the Group also observes a further probationary period of 90 days to upgrade from Stage 3 to 2. This means a probationary period of 180 days will be observed before upgrading financial assets from lifetime ECL (Stage 3) to 12 months ECL (Stage 1).

In the case of the new asset category for debt instruments measured at FVOCI, the measurement of ECL is based on the three-stage approach as applied to financial assets at amortised cost. The Group recognises the impairment charge in profit or loss, with the corresponding amount recognised in other comprehensive income, with no reduction in the carrying amount in the statement of financial position.

#### 2.2 Summary of significant accounting policies

The accounting policies applied by the Bank in these condensed interim financial statements are the same as those applied by the Bank in its consolidated financial statements as at year ended 31 December 2017 (other than changes mentioned in section 2.1 above). Below are the significant accounting policies.

#### (a) Interest Income and Expense

Interest income and expenses are recognised in profit or loss using the effective interest method. The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument to:

- The gross carrying amount of the financial asset; or
- The amortised cost of the financial liability.

When calculating the effective interest rate for financial instruments other than credit-impaired assets, the Group estimates future cash flows considering all contractual terms of the financial instrument, but not expected credit losses. For credit-impaired financial assets, a credit-adjusted effective interest rate is calculated using estimated future cash flows including expected credit losses.

The calculation of the effective interest rate includes transaction costs and fees paid or received that are integral part of the effective interest rate. Transaction costs include incremental costs that are directly attributable to the acquisition or issue of a financial asset or financial liability.

#### (b) Amortised cost and gross carrying amount

The amortised cost of a financial asset or financial liability is the amount at which the financial asset or financial liability is measured on initial recognition minus the principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between the initial amount and the maturity amount and, for financial assets, adjusted for any expected credit loss allowance (or impairment allowance before 1 January 2018).

The gross carrying amount of a financial asset is the amortised cost of a financial asset before adjusting for any expected credit loss allowance

#### (c) Calculation of interest income and expenses

In calculating interest income and expense, the effective interest rate is applied to the gross carrying amount of the asset (when the asset is not credit-impaired) or to the amortised cost of the liability. However, for financial assets that have become credit-impaired subsequent to initial recognition, interest income is calculated by applying the effective interest rate to the net carrying amount of the financial asset. If the asset is no longer credit-impaired, then the calculation of interest income reverts to the gross basis.

For financial assets that are credit-impaired on initial recognition, interest income is calculated by applying the creditadjusted effective interest rate to the amortised cost of the asset. The calculation of interest income does not revert to a gross basis, even if the credit risk of the asset improves.

#### (d) Presentation

Interest income and expense presented in the profit or loss includes:

• interest on financial assets and financial liabilities measured at amortised cost calculated on an effective interest basis;

• interest on debt instruments measured at FVOCI calculated on an effective interest basis;

Interest income and expense on all trading assets and liabilities are considered to be incidental to the Group's trading operations and are presented together with all other changes in the fair value of trading assets and liabilities in Net trading income on financial instruments classified as held for trading.

Interest income and expense on other financial assets and financial liabilities at FVTPL are presented in interest income or interest expense.

#### (e) Non-interest income and non -interest expense

#### Sharia income

Included in interest income and expense are sharia income and expense. The Group's income as a fund manager (mudharib) consists of income and expense from Mudaraba and Hajj transactions, income from profit sharing of Sukuk and Mudaraba financing and other operating income.

Mudaraba income by deferred payment or by installment is recognised during the period of the contract based on effective method (annuity).

Profit sharing income from Mudaraba is recognised in the period when the rights arise in accordance with agreed sharing ratio, and the recognition based on projection of income is not allowed.

#### (f) Fees and commission income and expense

Unless included in the effective interest calculation, fees and commissions are recognised on an accruals basis as the service is provided. Fees and commissions not integral to effective interest arising from negotiating, or participating in the negotiation of, a transaction from a third party, such as the acquisition of loans, shares or other securities or the purchase or sale of businesses, are recognised on completion of the underlying transaction. Portfolio and other management advisory and service fees are recognised based on the applicable service contracts.

The same principle is applied to the recognition of income from wealth management, financial planning and custody services that are continuously provided over an extended period of time.

#### (g) Net trading income

Net trading income comprises gains less losses related to trading assets and liabilities, and includes all realised and unrealised fair value changes, dividends and foreign exchange differences

#### (h) Dividend income

Dividend income is recognised when the right to receive income is established. Dividends on trading equities are reflected as a component of net trading income. Dividend income on equity instruments

#### (i) Cash and cash equivalents

Cash and cash equivalents include notes and coins in hand, unrestricted balances held with central banks, operating accounts with other banks, amount due from other banks and highly liquid financial assets with original maturities of three months or less from the acquisition date, which are subject to insignificant risk of changes in their fair value, and are used by the Group in the management of its short-term commitments.

#### (j) Property, plant and equipment Recognition and measurement

Items of property, plant and equipment are measured at cost less accumulated depreciation and accumulated impairment losses.

Cost includes expenditures that are directly attributable to the acquisition of the asset. The cost of self-constructed assets includes the cost of materials and direct labour, any other costs directly attributable to bringing the assets to a working condition for their intended use, the costs of dismantling and removing the items and restoring the site on which they are located and capitalised borrowing costs. Purchased software that is integral to the functionality of the related equipment is capitalised as part of equipment.

When parts of an item of property or equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

The gain or loss on disposal of an item of property, plant and equipment is determined by comparing the proceeds from disposal with the carrying amount of the item of property, plant and equipment, and is recognised in other income/other expenses in profit or loss.

#### Subsequent costs

The cost of replacing a component of an item of property or equipment is recognised in the carrying amount of the item if it is probable that the future economic benefits embodied within the part will flow to the Group and its cost can be measured reliably. The carrying amount of the replaced part is derecognised. The costs of the day-to-day servicing of property, plant and equipment are recognised in profit or loss as incurred.

#### Depreciation

Depreciation is recognised in profit or loss on a straight-line basis to write down the cost of each asset, to their residual values over the estimated useful lives of each part of an item of property, plant and equipment. Leased assets under finance lease are depreciated over the shorter of the lease term and their useful lives.

Depreciation begins when an asset is available for use and ceases at the earlier of the date that the asset is derecognised or classified as held for sale in accordance with IFRS 5 -Noncurrent Assets Held for Sale and Discontinued Operations. A non-current asset or disposal group is not depreciated while it is classified as held for sale.

The estimated useful lives for property, plant and equipment are as follows:

Leasehold land	over the lease period
Leasehold buildings	50 years
Computer equipment	3 years
Furniture, fittings & equipment	5 years
Motor vehicles	4 years
Leasehold improvements	10 years

Capital work in progress consists of items of property, plant and equipment that are not yet available for use. Capital work in progress is not depreciated, it is transferred to the relevant asset category upon completion.

Depreciation methods, useful lives and residual values are reassessed at each reporting date and adjusted if applicable.

#### **De-recognition**

An item of property, plant and equipment is derecognised on disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on de-recognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in profit or loss in the period the asset is derecognised.

#### 2.3 Standards issued but not yet effective

New standards have been issued but are not yet effective for the period ended 30 September 2018; thus, it has not been applied in preparing these financial statements. The Group intends to adopt the standards below when they become effective:

#### IFRS 16 Leases

The International Accounting Standards Board (IASB or Board) issued IFRS 16 Leases on 13 January 2016. The new standard requires lessees to recognise assets and liabilities for most leases. For lessors there is little change to the existing accounting in IAS 17 Leases. The new standard will be effective for annual periods beginning on or after 1 January 2019. It is not expected that this amendment would be relevant to the Group.

#### IFRS 17 — Insurance Contracts

The International Accounting Standards Board (IASB or Board) issued IFRS 17 Insurance Contract on 18 May 2017. The new standard establishes the principles for the recognition, measurement, presentation and disclosure of insurance contracts within the scope of the standard. The new standard will be effective for annual periods beginning on or after 1 January 2021. It is not expected that this amendment would be relevant to the Group.

#### 2.4 Segment Information

Segment information is presented in respect of the Group's strategic business units which represents the segment reporting format and is based on the Group's management and reporting structure.

- a. All non-current assets are located in the country of domicile and revenues earned are within same country.
- b. Reportable segment

The Group has six reportable segments; Corporate Banking, Retail Banking, Commercial Banking, Institutional Banking, Non-interest Banking (NIB) and Sterling SPV which are the Bank's strategic business units. The strategic business units offer different products and services, and are managed separately based on the Group's management and internal reporting structure. For each of the strategic business units, the Executive Management Committee reviews internal management reports on a monthly basis.

The following summary describes the operations in each of the Group's reportable segments:

- Corporate banking provides banking solutions to multinational companies and other financial institutions.
- Retail and Commercial banking provides banking solutions to individuals, small businesses, partnerships and commercial entities among others.
- Non-Interest banking provides solutions that are consistent with Islamic laws and guided by Islamic economics
- Sterling SPV business objective is to raise or borrow money by the issue of bonds or other debt instruments

All transactions between business segments are conducted on an arm's length basis, internal charges and transfer pricing adjustments are reflected in the performance of each business.

The Executive Management Committee monitors the operating results of its business units separately for the purpose of making decisions about resource allocation and performance assessment. Segment performance is evaluated based on operating profits or losses and is measured consistently with operating profits or losses in the financial statements.

No revenue from transactions with a single external customer or counterparty amounted to 10% or more of the Group's total revenue in the period (2017: none).

(i) This represents the Naira eqiuvalent of \$50 million medium term amortising and short term trade loans granted by African Export-Import Bank for a period of five (5) years. The facilities attracts a fixed margin of 7.25% per annum respectively. Interest payable under the agreement is calculaed based on the actual number of days elapsed in a year. The Bank will also pay a one - off facility fee charge of 0.5% flat upon facility signing or at disbursement.

(ii) This represents Naira equivalent of \$18.75 million amortising Murabaha financing facilities granted by Islamic Corporation for the development of the private sector for a period of two years. The facility attracts a margin of 6.25%.

- (iii) Central Bank of Nigeria (CBN) in collaboration with the Federal Government of Nigeria (FGN) represented by the Federal Ministry of Agriculture and Water Resources (FMA & WR) established a Commercial Agricultural Credit Scheme, (CACS) to promote commercial agricultural enterprise in Nigeria. The Bank obtained the loan on behalf of the customer at zero (0) percent to lend to the customer at 7% - 9% inclusive of management and processing fee. Repayment proceeds from CACS projects shall be repatriated to CBN on quarterly basis, all loans under the agriculture scheme is expected to terminate on 30 September 2025.
- (iv) This represents a loan agreement between the Bank and Nigeria Mortgage Refinance Company PLC (NMRC) for NMRC to refinance from time to time Mortgage Loans Originated by the Bank with full recourse to the Bank on the terms and conditions stated in the agreement. The facility was obtained during the year 2016 at an interest rate of 15.5% per annum to mature 7 September 2031.

- (v) This is a facility granted as a result of the decision made during the June 2015 National Economic Council (NEC) meeting for deposit money banks to extend concessionary loans to state governments using the balance in the Excess Crude Account (ECA) as collateral. Osun & Kwara State Government indicated their willingness to work with Sterling Bank Pic on the transaction. The Osun State Government applied for a N10billion while Kwara State Government applied for N5billion. The facility was approved at the June 2015 National Economic Council meeting. The purpose of the Ioan is for developmental and infrastructure projects in the states. CBN is granting the Ioan to the states at 9% annually for 20 years.
- (vi) The Central Bank of Nigeria, as part of the efforts to unlock the potential of the real sector to engender output growth, value added productivity and job creation has established a N300 billion Real Sector Support Facility (RSSF). The Facility will be used to support large enterprises for start-ups and expansion financing needs of N500 million up to a maximum of N10.0 billion. The loan tenor is 10 years with moratorium and at all in rate of 9%.
- (vii) Non-Oil Support Export Stimulation Facility (NESF) is designed to redress the declining export credit and reposition the sector to increase its contribution to revenue generation and economic development. Its designed to be accessed by exporters at a single digit of 9% and maximum obligor limit of N5bn. It aimed at improving export financing and additional opportunities for exporters to upscale and expand their businesses in improving their competitiveness. The general aim is to diversify the revenue base of the country from mono economy i.e oil.
- (viii) Anchor Borrowers Programme (ABP) is an initiative of the Central Bank of Nigeria and was launched by President Muhammadu Buhari on November, 2015 in Kebbi State. CBN earmarked N40bn out of N220bn Micro Small and Medium Enterprises Development Fund (MSMEDF) to be given to farmers in cooperative at a single rate of 9% and the amount is dependent on the economics of production of each commodity. It aimed at creating an ecosystem to link small holder farmers (borrowers) and processors (anchor) in the agricultural value chain to achieve job creation, increase domestic production of agric commodities/raw materials, improve farmers income and reduce import duty.
- (ix) This represents the face value bonds under Bond Repurchase Agreement (REPO) with Central Bank of Nigeria

	Share premium	42,759	42,759	42,759	42,759

#### (c) Other regulatory reserves

The other regulatory reserves includes movements in the statutory reserves. Nigerian banking regulations require the Bank to make an annual appropriation to a statutory reserve. As stipulated by S.16(1) of the Banks and Other Financial Institution Act of Nigeria, an appropriation of 30% of profit after tax is made if the statutory reserve is less than paid-up share capital and 15% of profit after tax if the statutory reserve is greater than the paid up share capital.

#### (i) Fair value reserve

The fair value reserve includes the net cumulative change in the fair value on investments carried at fair value through other comprehensive income until the investment is derecoanised or impaired.

#### (ii) Regulatory risk reserve

The Central Bank of Nigeria stipulates that provisions for loans recognised in the profit or loss account be determined based on the requirements of IFRS. The IFRS provision should be compared with provisions determined under prudential guidelines and the expected impact/changes in retained earnings should be treated as follows:

(i) Prudential impairment allowance is greater than IFRS impairment allowance: transfer the difference from the retained earnings to a non-distributable regulatory risk reserve.

(ii) Prudential impairment allowance is less than IFRS impairment allowance: the excess charges resulting should be transferred from the regulatory risk reserve account to the retained earnings to the extent of the non-distributable reserve previously recognised.

#### (iii) Other reserves

The SMEEIS reserve is maintained to comply with the Central Bank of Nigeria (CBN) requirement that all licensed banks set aside a portion of the profit after tax in a fund to be used to finance equity investment in qualifying small and medium-scale enterprises. Under the terms of the guideline (amended by CBN letter dated 11 July 2006), the contributions will be 10% of profit after tax and shall continue after the first 5 years but banks' contributions shall thereafter reduce to 5% of profit after tax. However, this is no longer mandatory. In prior year, 10% of profit after taxation was transferred to SMEEIS reserves in accordance with Small and Medium Enterprise Equity Investment Scheme as revised in April 2005. The Bank has suspended further appropriation to SMEEIS (now known as Microcredit Fund) reserve account in line with the decision reached at the Banker's Committee meeting and approved by CBN.

The AGSMEIS reserve is maintained to comply with the requirement of Central Bank of Nigeria which requires banks to set aside 5% of their Profit After Tax for investment in Agri-Business/Small and Medium Enterprises. This Investment Scheme aimed at supporting the Federal Government's effort at promoting agricultural businesses as well as Small and Medium Enterprises. The fund is domiciled with the Central Bank of Nigeria.

#### (d) Retained earnings

Retained earnings are the carried forward recognised income net of expenses plus current period profit attributable to shareholders.

#### 33 Cash and cash equivalents

For the purpose of cash flow, cash and cash equivalents include cash and foreign monies, unrestricted balances with Central Bank of Nigeria, balances held with local Banks, balances held with bank outside Nigeria and money market placements.

Group		Bank	
September 2018	December 2017	September 2018	December 2017
15,602	15,404	15,506	15,404

#### 34 Contingent Liabilities and commitments

In the normal course of business, the Bank conducts business involving acceptances, performance bonds and indemnities. The majority of these facilities are offset by corresponding obligations of third parties. Contingent liabilities and commitments comprise performance bonds, acceptances, guarantees and letters of credit.

To meet the financial needs of customers, the Bank enters into various commitments and contingent liabilities. These consist of Financial guarantees and letters of credits. These obligations are not recognised on the statement of financial position because the risk has not crystallised.

Letters of credit and guarantees commit the Bank to make payment on behalf of customers in the event of a specific act, generally related to the import or export of goods. Guarantees and standby letters of credit carry a similar credit risk to loans.

The following table summarises the nominal principal amount of contingent liabilities and commitments with off-financial position risk:

In millions of Naira	September 2018	December 2017	September 2018	December 2017
Bonds, guarantees and indemnities	110,559	95,078	110,559	95,078
Letters of credit	41,717	26,102	41,717	26,102
Others	4,284	9,926	4,284	9,926
	156,560	131,106	156,560	131,106

#### 35 Changes on equities on initial application of IFRS 9

The following shows the impact of IFRS 9 adjustments on equity:

In millions of Naira	Regulatory risk reserves	Fair value reserve	Retained earning	Total
Impairment on:				
Loans and Advances	(5,383)	-	-	(5,383)
Loan commitments and financial guarantees	-	-	-	-
Placements	-	-	-	-
Treasury bills	-	-	-	-
FGN bonds	-	(24)	-	(24)
State bonds	-	(7)	(26)	(33)
Corporate bonds	-	(3)	(76)	(79)
Euro bonds	-	(246)	-	(246)
Total	(5,383)	(280)	(102)	(5,765)
