Operating Environment

Macro profile

- The Nigerian economy continued to show some positive signs though growth remains relatively at a slow pace. Higher oil prices, improved foreign exchange liquidity and significant decline in inflation have fueled the economic performance thus far;
- Headline inflation rate continued to trend downwards in 2018 to 11.2% as at June 2018 given a more stable exchange rate relative to 2017;
- Brent crude oil rose to \$74pb as a result of the conformity of OPEC and key non-OPEC countries to the deal on production cut, strong global economic growth and supply disruptions in some oil producing countries;
- External reserves also continued to rise grow amidst steady oil production and relatively stable high oil prices, reaching US\$47.6bn in June 2018 from US\$30.2bn in the same period in 2017;
- The Monetary Policy Rate (MPR) was held constant at 14%, CRR at 22.5% and liquidity ratio at 30% in response to inflationary pressures.
- On the regulatory stance, the CBN released operational guidelines to kick-off utilization under the PBoC-CBN Bilateral Currency Swap and Small & Medium Enterprises Equity Investment Scheme (SMEEIS) which we expect to positively impact small and medium enterprises (SMEs).
